

VELAVALURU RAJITHA SAI

E-Mail ID : rajitha191203@gmail.com

Mobile : +91 72072 06516

CAREER SUMMARY:

Dedicated computer science with strong foundational in machine learning, deep learning, and web development. Successfully completed internships and projects that demonstrate strong analytical and problem-solving abilities. Committed to continuous learning and professional development with strong communicator to deliver innovative solutions and contributing to organizational growth.

PROFESSIONAL SUMMARY

- Proficient in programming languages such as Java, Python and web development technologies including HTML and CSS.
 - Demonstrates a proven ability to quickly learn new concepts and technologies.
 - Strong teamwork skills, capable of working independently and collaboratively.
 - Committed to continuous learning and staying updated with the latest advancements in technology.
 - Detail oriented with a strong emphasis on code quality and best practices.
-

INTERSHIPS:

- Sirius-CDW Technologies, Chennai (June 2023 to July 2023) Participated as an intern on machine learning and deep learning projects.
- Web Development Training and Internship in Vault of Codes which is approved by AICTE, Virtual mode from February 2024 to March 2024.

TECHNICAL PROFICIENCY:

- Languages : Java, Python, HTML, CSS
- Software : MS Word, PowerPoint
- Areas of Interest : Machine Learning, DBMS

SELF EVALUATION:

I am very optimistic and cheerful; I can quickly integrate into the work environment. I am a person who loves my job, careful work and strong sense of responsibility. I can actively communicate with my friends in daily work to improve work efficiency. Communication is my strength. Over achiever and Team support.

CERTIFICATIONS:

- Completed certification course on Python for Data Analysis from FreeCodeCamp.
- Completed an online certification course on Python for Data Science through NPTEL.

ACHIEVEMENTS:

- Participated in Level 1.1: E-Commerce and TechQuiz of the Flipkart Grid 5.0 Software Development Track organized by Flipkart.
- Certified by Dhakshin Bharat Hindi Prachar Sabha, Chennai.

ACADEMIC DETAILS:

B.E (Comp. Science) - Velammal Institute of Technology, Ponneri	-92.8%	2021 - 2025
HSC - Sri Chaitanya Junior College, Tirupati	-92%	2019 - 2021
SSLC - Sri Chaitanya English Medium School, Sullurpet	-98%	2018 - 2019

MINI PROJECT:

Blood Bank Prediction:

- Statistical analysis project predicting the necessary amount of blood in the future, developed using Python.
- Implemented various statistical models and machine learning algorithms to forecast blood demand.
- Created visualization to represent data insights and prediction results effectively.
- Analyzed historical data to identify trends and patterns in blood usage.
- Ensured the models accuracy by validating predictions against real world data.

Handwriting Recognition:

- Developed a machine learning project to recognize handwritten text.
- Used Python and frameworks such as Django for the web application and Streamlit for interactive model demonstrations.
- Collected and preprocessed a dataset of handwritten characters and words.
- Designed and trained convolutional neural networks (CNNs) for accurate handwriting recognition.
- Deployed the trained model as a web application using Django, allowing users to input handwritten text for recognition.
- Incorporated Streamlit to create an interactive interface for visualizing model performance and predictions.
- Conducted extensive testing to ensure the system's reliability and accuracy in different handwriting styles.

MAJOR PROJECT:

AUTOMATED AGRICULTURE MONITORING SYSTEM USING IOT

- Used C programming and microcontroller ESP32 to interface sensors and control communication modules.
- Integrated pH, NPK, and soil moisture sensors to collect key soil health parameters.
- Built logic to continuously monitor sensor data and detect threshold breaches.
- Connected a GSM module to the system to send SMS alerts when values drop below optimal limits.
- Ensured seamless data acquisition, processing, and communication using embedded C.
- Designed the system to assist farmers in timely decision-making for improved crop productivity.
- Tested the device across multiple conditions to ensure sensor accuracy and alert reliability.
